

Market APPLICATION Guide

30mm Stacklights

**30mm Pole****30mm Direct**

KEY FEATURES:

- State-of-the-Art Brilliant LED's
- Up to 3 Stacks (Red, Yellow, Green)
- 4-inch Pole or Direct Mount (Fits in 22mm Hole)
- With or Without Sound
- One Sound per Stacklight with 7 Different Sounds Available
- Small Enough to be Mounted Directly on top of the Control Box
- cUL Approved; NEMA 4X; IP-66

APPLICATIONS:

These ultra-compact 30mm diameter Stacklights are suitable for scientific or lab equipment including 3D printers, as well as industrial machinery. The sound and lights are controlled independently giving the user total control of which light(s) or sound is activated at any given time. Seven different sound types are available including a continuous tone, chime tone, and five different pulsing tones.

Applications include:

3D Printers
Industrial Label Machines
Machine Tooling
Food Machinery
Flow Control Equipment

Scientific Equipment
Inspection Equipment
Medical Equipment
Printing Machines
Assembly Equipment

Lab Equipment
Robotic Machines
General Industrial Control
Packaging Equipment
Pharmaceutical Equipment
